Bold Listings throughout the Buyers Guide indicate that a company has an advertisement in this issue of *Gear Technology*.

But Wait! Where are the Gear Manufacturers Listed?

If you are looking for suppliers of gears, splines, sprockets, gear drives or other power transmission components, see our listing of this issue's power transmission component advertisers on page 68. In addition, you will find our comprehensive directory in the December 2015 issue of *Power Transmission Engineering* as well as in our online directory at www.geartechnology.com.

How to Get Listed in the Buyers Guide

Although every effort has been made to ensure that this Buyers Guide is as comprehensive, complete and accurate as possible, some companies may have been inadvertently omitted. If you'd like to add your company to the directory, we welcome you. Please visit www.geartechnology.com/getlisted.php to fill out a short form with your company information and Buyers Guide categories. These listings will appear online at www.geartechnology.com, and those listed online will automatically appear in next year's printed Buyers Guide

powertransmission.com.

VISION

ARROW GEAR'S
ADVANCED DESIGN
ASSISTANCE

FOR GEARS THAT
CARRY THE LOAD

In aerospace manufacturing, high-quality gears with complex shapes and exacting materials are the standard. Today, extremely high loads are placed on increasingly lighter gearboxes. For spiral bevel gears to perform properly under these extreme conditions, gear teeth geometry must be precisely machined to achieve optimum contact.

That's where our Advanced Design Assistance comes in. By combining cutting-edge software with state-of-the-art machines, we speed the critical process of tooth contact pattern development. At Arrow Gear, we continually invest in our technology, equipment and people to produce the tight tolerances and extremely complex part designs the industry demands.
