September 8 - 13, 2008 · Chicago, IL · McCormick Place

THE KAPP KX 500 FLEX

FLEXIBLE

- Cylindrical spur and helical gears to 10 module (2.5 DP)
- Continuous generating and/or profile grinding
- Dual independently-adjusted dressing spindles (optional)

EFFICIENT

- On-board measuring
- Intuitive Kapp HMI software
- Operator friendly, optimized for manual loading
- Robot loading-ready

RELIABLE

The reliability of KAPP and NILES products is world renowned. The KAPP Group is a leader in innovative technology and systems for precision finishing of gears and profiles serving the automotive, aerospace, marine, construction and mining industries.

*Call us for more information about the
KX 500 FLEX.*

Geared to make things move.
