

# DIFFERENT MACHINES DIFFERENT DESIGNS

**HOBGING ≠ SHAPING**

**GRINDING ≠ HOBGING**

**SHAPING ≠ GRINDING**

Each of our E series machines have been designed for a specific application. Using the tools of Finite Element Analysis and three dimensional CAD, we have been able to optimize our machine designs to efficiently and economically produce gears. Each unique design is capable of handling all of the varied loads, stresses, heat and process byproducts generated by the cutting or grinding conditions.

**Come see us at  
the IMTS 2008 in Chicago  
Booth 7025  
in the North Building**
