

Precise Bore Geometry and Advanced Surface Finish Makes Smoother Running Gears: *That's The Sunnen Solution.*

Sunnen makes the largest selection of high precision honing machines in the world. Our systems are designed with a focus on reliability, flexibility, and ease of use in mid- to high-production applications.

Sunnen is the technological leader for high precision honing of all types of gears, including helical, pinion, worm, spline, sprocket, and spur gears. The Sunnen solution provides a more accurate bore, allowing you to manufacture a more accurate gear. The result is smoother, quieter running gears that can transfer more power.

From design to delivery, our technical experts will work with you to create a complete solution to fit your exact requirements, including the machine model, number of spindles, style of tooling, fixture design, abrasives selection, automation and gaging packages, and any other platform customization you may require. Plus, Sunnen's worldwide sales and technical service team provides comprehensive support for every system we make.

Precision machines, quality accessories, and unparalleled service and support: That's the Sunnen Solution.
