

# What's On Your

We, the Addendum team, like to think of ourselves as hip, cutting-edge, culturally conscious and cool. And because we're curiously (some would say pathetically) devoted to gears, we thought we'd share with you our MP3 playlist, which, of course, consists only of songs with the word "gears" in the lyrics.

Our playlist includes a wide variety of musical genres, from the Beach Boys to 50 Cent. We've got blues, country, pop, heavy metal and rap. We like to think of ourselves as having eclectic tastes. Most people just think we're weird.
